US Patent # 8,997,445 B2

valpape  
Printed in Canada

Are you tired of seeing your valuable **canola, pea's, soy beans, barley, wheat** as well as other seeds being smashed and thrown over the back of the pick-up by the retractable fingers on the auger.

The Michel's Crop Catcher is a header attachment designed to nearly eliminate seed loss due to shattering by the retractable fingers, plus nearly eliminate feeder house build up. The Michel's Crop Catcher also helps to keep dust off of the front window.

**If you would rather see this and put your valuable grain in the hopper.**

**FEEDER HOUSE BUILD UP AFTER 320 ACRES OF COMBINING**

**Rather than lose that seed and have to clean off this everyday!!!**

**AFTER 40 ACRES WITHOUT CROP CATCHER**

Testimonials:

*I loved it! I put a Crop Catcher on my New Holland 9080 just to try it. It worked so well at saving my otherwise lost canola and keeping the feeder house clean that I put a second one on my New Holland 9090 after using my first one for only 5 hours! **It definitely paid for itself.***

*Kevin & Claire Graham  
Marsden, SK*

*I really liked it! It worked really well at keeping the feeder house clean, and more importantly I saved a lot of canola and peas too! **The Crop Catcher is worth having.***

*Bill Herle  
Neilburg, SK*

*It worked great! I know it paid for itself with the seed we saved, and the feeder house on our combines hardly got a thing on them all Fall. **Definitely a good product!***

*Dennis Carter (C2 Farms)  
Provost, AB*

*It worked amazing! I couldn't see or hear any canola bouncing off the front window so I know it was going into the combine. I never cleaned the feeder house off once all Fall. I really liked it.*

*Darren Manchester  
Senlac, SK*
