- **“S” series: 660, 670, 680, 690 for Manual Fold Extensions and Crary “Big Top” on Manual Fold Extensions**

All Components are easily removable in minutes.

Tension Control & Front Roll Tube Assembly

- Front roll tube assembly works together with electric drive to provide tension for opening and closing the tarp.

Cross Members & Tarp Fabric

- Tarp fabric is manufactured from 20 oz. PVC
- Specially designed cross members are sewn into tarp fabric for added support
- Specially molded track on hoods seal moisture out when tarp is closed.

Features:

- Hoods are equipped with two handgrips
- Tarp components can easily be removed down to extension height in less than 10 minutes.
- Dome shaped hoods enable grain tank to be filled to max. capacity.

Manufactured By:

Michel's Industries, Ltd.

Removable Hoods & Clamps

- Two interlocking hoods are designed for easy removal.
- Hoods are molded from high density plastic.
- Specially designed hood clamps are used to attach hoods (no drilling required).

Electrical Assembly & Switch

- A 12Volt DC motor is a standard feature on all combine covers.
- The motor and roll tube assembly is easy to remove.
- The switch is mounted outside of cab

Tarp components can be stored inside grain tank.

- Hoods have extended corners to shield rain from entering the hopper corners.
- Majority of metal components are manufactured from aluminum to reduce weight.
